

Pani Booking App — User Research & Detailed Analysis

Yeh report un sources ka compilation hai jo app ka layout banate waqt study kiya gaya — customer behaviour, business models, pricing data aur UX lessons. Har finding ke saath “Iska matlab hamare app ke liye” box hai, taaki students dekh sakein ki research ne design decision ko kaise shape kiya. Compiled: 29 September 2026.

RESEARCH QUESTIONS

+ user ke 10 points & reference image

01 · Executive Summary

App jeet-ta hai repeat ordering par, naye orders par nahi. Water delivery me customer har baar scratch se nahi chunta — wahi purana order dohraata hai, tab jab jar khaali ho rahi ho. Isliye PaniBox ka home screen hi repeat machine hai: ek bada button, default settings (2 jars, kal subah) pre-selected. Iske aage ke design decisions seedhe research se aaye hain:

- **Jar exchange business ka dil hai** — Bisleri order karte waqt hi empty jars poochta hai aur Rs 150/jar deposit leta hai.
- **Reliability asli product hai** — customers price se zyada bharosa kharidte hain; is segment me price sensitivity kam hai.
- **Arrival window live map se better hai** — live dot delivery ko aur slow feel karwata hai.
- **Pause option zaroori hai** — customers bahar jaate hain, ek tap me rokna chahte hain.
- **WhatsApp industry ka default channel hai** — support aur bills dono wahan.
- **UPI + COD dono chahiye** — cash ab bhi common hai; prepaid wallet supplier ke liye best hai.

Recommendation: pehle MVP sirf itna — ek screen, bada button, jar exchange stepper, arrival window, pause link, UPI/COD chips, WhatsApp help. Rewards/referrals/games sab v2 me.

02 · Research kaise hui

Teen research questions lekar web research ki gayi (secondary research). Internal inputs: user ke 10 feedback points — minimal app, ek bada book button, order status, address + GPS current location, feedback/complaint option, delivery time choice — aur ek reference image jisme do product cards the: 20L Jar Rs 28 (refill) aur 20L Jar + Container Rs 30, dono par +/- quantity stepper.

- **RQ1 — Customer behaviour:** “water can delivery app India 20 litre jar customer behavior”, “water delivery app features India subscription empty jar exchange deposit”
- **RQ2 — UX patterns:** “on-demand water delivery app UX best practices repeat order delivery tracking payment COD India”
- **RQ3 — Market & business:** pricing data, subscription models, jar economics (Sources C, F)

03 · Findings — evidence ke saath

F1 · Repeat order hi asli use case hai — naya order nahi

Water delivery me lagbhag koi bhi customer har baar scratch se supplier nahi chunta. Log tab order karte hain jab pani khatam ho raha hota hai, aur wahi purana order dohra dete hain.

- Aquahaulers (water delivery app) UX research ka #1 conclusion: “the reorder is the real use case” — first-time flow ko primary banana rare case optimise karna hai.
- Can Can (Chennai): “predictive ordering — one tap to repeat your history, minimum friction” — poora product hi repeat par based hai.
- Rekart: 20L jar customers weekly ya bi-weekly order karte hain; ek baar aadat bane to churn bahut kam.

ISKA MATLAB HAMARE APP KE LIYE

Home screen hi “repeat machine” hona chahiye — bada BOOK NOW button default last settings se book karta hai, product cards ke steppers pre-filled rehte hain, aur onboarding ko utna importance nahi jitna repeat flow ko.

Sources: A1, C1, C2

F2 · Empty jar exchange business ka dil hai — deposit ke saath

20L jar ek returnable asset hai. Har delivery ke saath khaali jar wapas aani chahiye, warna supplier ka stock khatam ho jata hai — isliye har bada player order ke waqt hi empty jars poochta hai.

- **Bisleri** order flow me hi poochta hai: “Have empty jars with cap?” — quantity bhi. Bina empty jar par Rs 150/jar refundable deposit; cap missing par Rs 3/jar extra; pickup request ke baad 10 working days, refund wallet me.
- **Paniwale** (Pune): Rs 150/jar deposit, “Return & Repeat — return empty jars when we deliver new ones.”
- **Rekart**: deposit Rs 200–300/jar standard; customer ke paas 2–3 se zyada jars pending ho to delivery rok do; owner ko 2.5–3 jars per customer ka buffer rakhna chahiye.
- **PLOS One** (Bihar): deposit-theft itni badi problem thi ki supplier ne deposit model hata kar hardware outright bechna shuru kiya (Rs 250–275) — issue grassroots tak asli hai.

ISKA MATLAB HAMARE APP KE LIYE

Booking sheet me hi “Empty jars exchange” stepper — Bisleri ka proven pattern. Customer bata de kitni khaali jars ghar par hain, delivery boy saath le jaye. Naye customer ke liye deposit ka clear note (Rs 150/jar) — baad me argument nahi.

Sources: E1, E2, C2, C3, A2

F3 · Customer price se zyada reliability kharidta hai

Is segment me price sensitivity kam hai, reliability ki demand sabse zyada — pani non-negotiable daily need hai.

- **Rekart**: “low price sensitivity — customers prioritise reliability over cost; high purchase frequency; strong retention.”
- **Aquahaulers research**: customers ke top frustrations — verbally quoted alag price, koi confirmation nahi, koi arrival window nahi. Certainty hi asli product hai.
- **Salesforce data** (WaterDeliverySolutions ki quote): achha experience ho to 78% customers mistake ke baad bhi wapas aate hain.

ISKA MATLAB HAMARE APP KE LIYE

Order confirm hote hi saaf confirmation (order ID, time, amount) aur status card me pakka arrival window. “Jaldi bhejo” me ~2 ghante ka window do. Hidden charges kabhi nahi — price pehle, confirm baad me.

Sources: C2, A1, D4

F4 · Live map dot se arrival window zyada trustworthy hai

Counter-intuitive UX finding: delivery boy ka live location dikhana trust kam karta hai, frustration zyada.

- **Aquahaulers** ne live map se shuru kiya tha — users ne gaadi ko 40 minute crawl karte dekha to delivery slow feel hui. Final design: “an arrival window, not a live dot — a moving dot invites watching, a window does not.” Map sirf delivery ke paas dikhta hai.
- Wohi case study: “surge changes the quote before booking, never after” — price lock hona chahiye.

ISKA MATLAB HAMARE APP KE LIYE

Status card me “Mahesh laakar dega · window 9–9:30 AM” — 30-minute ka window, live map nahi. Delivery partner ka naam + call button (dispute settle karne ke liye). Simple 4-step tracker kaafi hai.

Sources: A1

F5 · Pause option subscription ka sabse common request hai

Log ghar se bahar jaate hain (shaadi, vacation, exam) — tab paani rokna hota hai aur wapas aane par resume.

- **Rekart**: “refill schedules and standing orders with pauses, quantity changes and holiday skips” — core feature.
- **Pure Pani**: “one-tap pause, auto-resume on return date. Customers can also request pauses from their own app.”
- **Intelegencia case study**: brands ko calendar dashboard dena pada jisse subscribers khud pause/resume karein — support calls kam karne ke liye.
- **Bisleri** bhi allow karta hai: “you can hold your subscription temporarily.”

ISKA MATLAB HAMARE APP KE LIYE

Bade button ke neeche chhota “Pause auto-delivery” link — ek tap me pause, dobara tap me resume. Support calls ghatengi aur customer control me feel karega.

Sources: B1, B2, A5, E1

F6 · WhatsApp hi is industry ka asli channel hai

Chhote pani walon ke paas orders calls aur WhatsApp par aate hain — apps par nahi. Jo bhi app bane, WhatsApp ko ignore nahi kar sakta.

- **Rekart**: “refill requests arrive by call and message” — unka AI agent WhatsApp par refill aur pause requests handle karta hai.
- **Can Can** (Chennai): poora ordering WhatsApp par — “no downloads, no accounts” — 500+ active customers.
- **Pure Pani**: bills aur low-balance alerts WhatsApp par; 40+ agencies the jahan Rs 18,000–70,000/month ke leaks ho rahe the.
- **PaniHisab**: bills one-tap WhatsApp share, Hindi/Gujarati me.

ISKA MATLAB HAMARE APP KE LIYE

App me “WhatsApp help” button (home screen + account menu). Future me order confirmations bhi WhatsApp par bhejna — sirf push notification nahi.

Sources: B1, C1, B2, B3

F7 · Payments: UPI + COD dono, prepaid wallet best

Cash ab bhi is segment me bahut common hai, lekin digital collection supplier ke liye zindee-bhaar hai — dono rakhna zaroori hai.

- **Rekart:** prepaid wallet “most scalable — eliminates monthly billing complexity and collection effort.” B2B (offices) me monthly postpaid invoicing standard.
- **Pure Pani / PaniHisab:** UPI, PhonePe, Paytm, Razorpay + cash — “let customers pay however they want.”
- **Bisleri:** notable exception — unke doorstep app par COD available nahi hai; chhote players ke liye ye luxury nahi.

ISKA MATLAB HAMARE APP KE LIYE

Booking sheet me do payment chips: UPI (GPay/PhonePe/Paytm) aur Cash on Delivery. Version 2 me prepaid wallet — “Rs 500 add karo, har delivery auto-cut” — supplier ka collection ka jhanjhat khatam.

Sources: C2, B2, E1

F8 · Market: demand tezi se badh rahi hai, prices bhi

Quick-commerce aur urbanisation se 20L can ka market growth mode me hai — project ka context.

- **Blinkit analytics (Delhi):** average 20L can price Rs 72 (2020) se Rs 98 (2026); availability 78% se 95%; premium residential orders 220K se 640K, urban 420K se 1.1M.
- **Actowiz price study:** 20L can apna alag business hai — alag availability, alag pricing logic; 250ml bottle vs 20L can ka price-per-litre gap kai guna.
- **Rekart:** offices ek floor me 20–30 jars/month; RWA empanelment se ek approval = 50–200 households.
- **JalSeva (GitHub):** open-source tanker-delivery platform — 3-tap booking, GPS, UPI, 22 languages. Students ke liye ready reference.

ISKA MATLAB HAMARE APP KE LIYE

Market validation strong hai. Scope: pehle households (simple repeat ordering), baad me societies/offices (bulk, monthly billing). Local survey karke price set karo — range Rs 28–30 (local) se Rs 98 (quick-commerce) tak hai.

Sources: F2, F1, C2, C5

04 · Research se Design Decisions

App feature	Kis finding se	Kyun
Bada circular BOOK NOW button (one-tap, default settings)	F1 — repeat order	Reorder ko primary path banana
Empty jars exchange stepper + Rs 150 deposit note	F2 — jar economics	Bisleri ka proven pattern; stock leakage rokta hai
Arrival window (9–9:30 AM) + rider naam + call button	F3, F4 — reliability	Certainty bechna, live map nahi
Pause auto-delivery link	F5 — pause/resume	Sabse common self-service request
WhatsApp help button	F6 — WhatsApp channel	Industry ka default support channel
UPI / COD payment chips	F7 — payments	COD is segment me must; wallet v2 me
Jar vs Jar+Container cards, steppers (Rs 28/30)	User ki reference image	Do SKUs, quantity product page par hi
Quality trust line (RO+UV, lab test, report)	F3 + A3	Quality proof reliability ka signal hai
Feedback + Complaint sheet	User point #7 + F3	78% customers complaint raste hone par wapas aate hain

05 · Poora Source Library — saare links

19 sources, 6 groups me. Codes (A1–F2) findings me use hue hain. Sab clickable hain.

A — User research & UX case studies (sabse important)

A1 · Aquahaulers — Water Delivery App Design Case Study

designwithsampath.com/work/aquahaulers-app

Water tanker marketplace ka poora UX research. Key lessons: reorder = real use case; arrival window beats live dot; named sizes, cached addresses; quote-before-commit; surge kabhi post-booking nahi.

A2 · PLOS One — Willingness to pay for potable water delivery (rural Bihar)

journals.plos.org/plosone/article?id=10.1371/journal.pone.0283892

Peer-reviewed study. SHRI model: Rs 10/delivery (summer Rs 15), Rs 120 deposit se hardware sale (Rs 250–275) tak ka safar. WTP ~half of market price; jars ka repurposing (grain storage).

A3 · Medium — Designing a Seamless Water Delivery App (UX journey)

medium.com/@nanishanmugam3/designing-a-seamless-water-delivery-app

Surveys se 3 user needs: choice, quantity flexibility, effortless ordering. Quantity selection product page par hi (extra screen nahi); checkout steps kam karo.

A5 · Intelegencia — D2C Water Brand Digital Transformation

intelegencia.com/case-studies/engineering/digital-transformation-for-a-d2c-water-brand

Indian D2C subscription brand. Phone-par onboarding 15 minute (drop-offs) tha → OTP signup, calendar pause/resume, push notifications, rewards engine.

B — Business operations: jars, deposits, routes, subscriptions

B1 · Rekart — Water Delivery Software for Jars, Refills and Depositsrekart.io/in/water-delivery-software

“Every 20 litre jar out there is your asset.” Deposit tracking, refill requests calls/WhatsApp se, standing orders with pauses, riders log empties per stop.

B2 · Pure Pani — Water Delivery Business Apppurepani.in

40+ agencies ke saath bana; Rs 18k–70k/month ke leaks. WhatsApp bills, UPI one-tap, customer QR app, 8 languages, offline delivery, one-tap pause. RO version: purepani.in/ro_water_supplier_app

B3 · PaniHisab — Water Delivery Management Softwarepanihisab.in/water-delivery-software

Paper-diary problem ka solution: daily entry, carry-forward dues billing, jar return tracking, WhatsApp bills, Hindi/Gujarati. Rs 99/month. Features: panihisab.in/features

B4 · EPIXS — Water Can & Jar Delivery Software (Tirupati)epixs.in/software/water-delivery-software

Local vendor view: delivery-boy app me cans given / empties returned / cash collected per stop; live jar counts; daily/alternate-day/weekly schedules.

C — Competitor apps & business guides**C1 · Can Can (Chennai) — WhatsApp-only water delivery**cancanindia.com

No app, no account — sirf WhatsApp. “Predictive ordering: one tap to repeat your history.” 500+ customers, 50+ vendors, 10k+ orders. WhatsApp-first model ka proof.

C2 · Rekart — How to Start a Water Jar Delivery Business in Indiarekart.io/insights/how-to-start-water-jar-delivery-business-india

Business blueprint: 2.5–3 jars/customer buffer; Rs 200–300 deposit; RWA empanelment (50–200 households); offices 20–30 jars/floor/month; prepaid wallet; low price sensitivity, low churn.

C3 · Paniwale (Pune) — Premium Jar Deliverypaniwale.com

Subscription plans: 10/20/30 jars per month, 10–20% savings, free delivery. Rs 150/jar refundable deposit. “Return & Repeat” model.

C5 · JalSeva (GitHub) — Open-source water tanker platformgithub.com/divyamohan1993/jalseva

Students ke liye excellent reference: 3-tap booking, Firebase OTP, live GPS tracking, UPI (Razorpay), PWA, voice-first 22 languages. Poora code padha ja sakta hai.

D — App development guides**D1 · Octal — Water Delivery App Development Guide**octalsoftware.com/blog/water-delivery-app-development

Standard feature checklist: scheduled deliveries, tracking, payments, quantity selection; driver + admin app structure; tech stack suggestions.

D2 · Goteso — Water Delivery App Developmentgoteso.com/solutions/water-delivery-app-development.html

Customer/driver/admin tri-app model, order states, proof of delivery, schedule & subscription management.

D3 · Appinop — On-Demand Water Supply Appappinop.com/water-delivery-app-development-company

AI auto-reorder before customers run out, IoT integration, route optimization, deposit management — advanced/future features.

D4 · Water Delivery Solutions — Customer Journey Blogwaterdeliverysolutions.com/blog/seamless-customer-journey-...

Order lifecycle (placed→picked→packed→dispatched→delivered), ETA calculation, payment links; Salesforce: 78% customers good CX ke baad mistake se bhi wapas aate hain.

E — Big-brand reference: Bisleri (industry standard)**E1 · Bisleri — Official FAQs**bisleri.com/FAQs.html

Order flow me “Have empty jars with cap?”. Subscription types (Daily/Weekly/Custom), duration (1 month–1 year), hold/hold-off, Return Jar request (10 working days, wallet refund), Bisleri Wallet.

E2 · Bisleri — 20L Jar Deposit Product Pagebisleri.com/Bis-20LTRDeposit-Amount-Product.html

Rs 150/jar refundable deposit. Cap missing = Rs 3/jar extra. COD available nahi. Lift na ho to delivery security gate / 2nd floor tak. Hours 8am–8pm (Sunday closed). Dispute window: 3 din.

F — Market data & pricing analytics**F1 · Actowiz — Bottled Water Price Per Litre Study (Method)**actowizsolutions.com/bottled-water-price-per-litre-india.php

30 zones, 10 cities. 20L can = alag business: apni availability, apni pricing logic. Small-pack vs 20L can ka price-per-litre gap kai guna. Delivery-inclusive pricing report karo.

F2 · ActowizMetrics — Blinkit Water Can Sales Analytics (Delhi)actowizmetrics.com/blinkit-water-can-sales-data-analytics.php

Quick-commerce trend: avg 20L price Rs 72→Rs 98 (2020–2026); availability 78%→95%; premium residential 220K→640K orders; urban 420K→1.1M. Top SKUs: Bisleri/Kinley/Aquafina/Bailley 20L.

06 · Students ke liye — aage kya karein

Yeh research secondary hai (web sources). Asli product ke liye primary research bhi karni chahiye — iska process:

PANIBOX PROJECT · RESEARCH COMPILATION · 19 secondary web sources · 29 September 2026

Note: market numbers (prices, order volumes) source websites ke claims hain, independently audited nahi. Primary research (section 06, step 1–2) se verify karna zaroori hai.
